**“SOMEWHERE
IN TIME”**

Legacy Academy
FOR CHILDREN

With field trips, sports, cooking and crafts, campers at Legacy Academy's Summer Camp will be "Somewhere in Time" as we discover endless possibilities all summer long. Join us as we travel back through time and look to the future!

REGISTER NOW FOR SUM

Week 1 TIME TRAVEL

Embark on an exciting adventure over the next 10 weeks and learn about different periods in history as we 'time travel' from the Stone Age to the Space Age. We'll explore how ancient people used the sun to tell time and later invented precision clocks. We'll also study how the Earth's rotation and orbit around the sun helped man develop the calendar we still use today.

PREHISTORIC

Week 2 What was the planet like when dinosaurs roamed the Earth? Which dinosaurs were herbivores or carnivores? We'll "dig" for those answers and have our own archeological expedition, make fossils for future scientists to discover and visit a museum to hunt down creatures from a time long gone.

ICE AGE

Week 3 During Week 3, students will explore the Ice Age when the planet was covered with glaciers and polar ice sheets. We'll conduct science experiments on the properties of water, make our own crystals and learn how mammoths and mastodons survived in this brutal climate. We'll also make and enjoy ice cream.

Week 5 RENAISSANCE

MEDIEVAL TIMES

Campers will step into the world of knights and learn about chivalry, courage and loyalty. Choose your own colors and banner while exploring the sports of the time. Discover the meals the knights ate and sample some of the food while learning how it was cooked and prepared long before electricity.

Campers will discover new ways of thinking and solving problems as they delve into the period known as the Renaissance. Learn about the famous artists, poets, scientists and mathematicians of the time. Students will write poetry, create artistic masterpieces and new inventions using the same creative techniques used by the great thinkers of the Renaissance.

MMER CAMP AT LEGACY!

Week 6 WILD WEST

We'll also "Time Travel" to the Wild West and explore the history of the way the US grew from "sea to shining sea". We'll learn about the buffalo and cattle that populated the plains and the lives of the brave men and women who dared to "go West!" Campers will discover how we stayed in touch long before the telephone through the telegraph and the Pony Express.

ROARING 20s & 30s

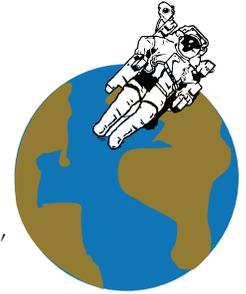

Week 7

Discover the exciting times of the 20s and 30s - the fashion, architecture, music and dance. We'll plan and create models of our own art deco buildings, learn to dance the Charleston and explore the history of jazz music.

THE SPACE AGE

Week 8

Science fiction becomes often science fact. Campers will explore the role of the scientists, engineers, astronauts and pilots who helped a nation come together to do what some said was impossible as we rocket into The Space Age. Watch a clip of man first walking on the moon and check out life on the Space Station. We'll also explore new foods and beverages that were invented for life in zero gravity.

THE FUTURE

Week 10

What do you want to be when you grow up? Explore the endless possibilities of what you could do in the future. Using experiences from the past, what invention would make for a better tomorrow? Our final week offers campers an opportunity to give back to the community and leave a legacy that will be remembered for many years to come.

THE 80s

Week 9

This week campers will have a chance to discover the trends and styles from the 80s. We'll take a look at how fashion, music and dance represented the decade and still influence us today. We'll also learn about the great thinkers who brought us the first personal computers and learn to "moonwalk," as well as how a nation turned its focus toward better health through exercise and diet.
